

Crosslinking Agent

Basis:	Emulsifiable, modified polyisocyanate.	
Technical Data:	Viscosity (mPas):	approx. 1,300 (Brookfield)
	Density (g/cm ³):	approx. 1.14 (9.5) lbs./gal)
	NCO content (%):	approx. 20
	Color:	clear
Characteristics:	Increases the resistance of a dispersion adhesive to moisture; also increases the adhesive properties.	
Applications:	Increases water resistance and adhesion when mixed with various dispersion adhesives.	
Directions for use:	Optimum processing period:	approx. 4-8 hours at 3-5% (depending on the type of dispersion)
	Please refer to the individual data sheets for the various emulsion glues. Containers which are used to pre-mix Jowat 195.40 may not be tightly closed (they may burst due to formation of carbon dioxide).	
	Tested according to Jowat test methods. Customer trials are recommended.	
Cleaning:	Machines and equipment may be cleaned after use with warm or cold water, using Jowat Cleaner Concentrate 192.40. Parts only soiled with the crosslinking agent may be cleaned with Jowat Thinner 401.40/402.30. Cured adhesive compound can only be cleaned mechanically.	
Storage:	May be stored for six (6) months after date of delivery ex production site in properly closed original containers, cool and dry (15-25°C). Keep containers well-closed. Keep the containers tightly sealed and protect against humidity.	
Packaging:	Unit size on request.	
Marking:	Consult Material Safety Data Sheet for further information.	
Date Revised:	March 2005 (S)	

The information contained in this leaflet is based upon our practical experience and the results of tests in our laboratory. The information contained represents average values under our test conditions. Although our testing is constantly being revised to represent the latest conditions, the information provided in this leaflet and by our free technical information service should be used only as a guide, but cannot be relied upon as a guaranty of performance or results. We strongly recommend that any user of our products conduct its own testing.
